B.A., Computer Science, Economics, Kellogg Managerial Analytics Certificate Major GPA: 3.93/4.0

Relevant Coursework: Data Structures, Intro to Systems, Intro to Computer Networking, Machine Learning

Experience

Northwestern Associated Student Government Services Committee Evanston, IL
Web Developer Oct 2015 – Present

- Utilize the MEAN stack and D3.js to create an online visual representation for a student's college course plan

A.T. Kearney Shanghai, China
Consultant Assistant Jul 2015 – Sep 2015

- Conducted industry benchmarking research and product innovation research for a FMCG giant in China
- Managed the Chinese-to-English translations of numerous consulting slide-decks and interview notes by delegating and coordinating work to 9 part-time assistants

Project Pitch Entrepreneurship Competition Evanston, IL
Contestant Mar 2015 – May 2015

- Created a business plan and mock-up for BARQ, an innovative in-class question-asking mobile application
- Prepared a presentation and pitched the final business idea to a panel of judges

Personal Projects

Rain Rain Go Away! (Personal Project)

- Developed an iOS application that sends a push notification reminding the user to bring an umbrella if it is going to rain soon. Used weather API calls, Apple's Core Location, and Xcode's Interface Builder.

MyownGains (HackIllinois 2016)

- Developed an iOS application that connects with the Myo armband to count the number of proper pushups a user completes. Used Swift and the Myo API.
- Designed and implemented the algorithm for the armband to recognize pushups using finite-state machines.

Tab Saver (Personal Project)

- Created a Chrome extension that allows the user to quickly save the browser's current tab, window, or session and access it later on. Used HTML/CSS and Vanilla Javascript.

kevincheng.tech (Personal Website)

- Created and set up the front-end for my personal website. Used HTML/CSS, Javascript (jQuery), and Bootstrap.

Other Projects:

- Utilized Swift's SpriteKit library to develop a simple game where the player taps to avoid incoming obstacles.
- Used Python's tkinter GUI library to create a hangman game that teaches the player a new word every game.

Other Organizations

Institute for Student Business Education, *Technology Team Member* 2015 – Present
Chinese Student Association, *Junior Executive* 2015 – Present
Northwestern University Boxing Club, *A-Team Member* 2014 – Present
The Investment Club, *Vice President* 2011 – 2014

- Introduced new members to investment concepts/strategies by preparing educational presentations
